CL 205 Operating Systems Lab

Lab # 3

Shell Scripts

Instructions:

1. Make a word document with the convention "SECTION_ROLLNO _LAB-NO". In addition, paste all of your work done at the LINUX prompt.
2. You have to submit a Word File.
3. Plagiarism is strictly prohibited; negative marks would be given to students who cheat.

1. Write a program that add two numbers and display the output.
2. Write a program to find largest number from given three numbers.
3. Write Script, using case statement to perform basic math operation as follows
 - + Addition
 - Subtraction
 - * Multiplication
 - / Division
4. Write a program that read number as input, calculate, and return the summation of the all digits of the number.

Example:

If given number: 745

Then result will be: $(7+4+5) = 16$

5. Write Script to see current date, time, username, and current directory.
